Take a bow

It's time for your standing ovation!

Celebrating
15 years
C-LEG

15 years of making history together

The C-Leg first appeared in the US in 1999. As practitioners like you started fitting the world's first microprocessor-controlled knee, we saw the landscape change with dramatically improved outcomes for your patients.

The shift has fundamentally improved transfemoral fittings and led to the latest generations of microprocessor-knees – while furthering advances in patient care.

To honor your commitment to improving patient's lives and to thank you for your partnership with us, we're excited to give you a standing ovation!

Everything you need to share your success

Because a 15-year anniversary is newsworthy, we have created materials to help you generate extra attention for your clinic during this C-Leg anniversary year.

As a Hanger branch, you have additional marketing and reimbursement support to stand out in the crowd.

And your Sales Representative is always available to help!

Partnering with you

We'll be with you beyond this celebration, too. Our Professional and Clinical Services staff will continue to provide support in person, via phone and internet. Our Sales Reps are ready and willing to partner with you to grow your business.

We know that change brings challenge – and we thank you for helping make every generation of the C-Leg a success.
